

MONTGOMERY COUNTY, MARYLAND

Preserving Our Agricultural Heritage

Connecting Our Past...With Our Future

www.montgomerycountymd.gov/agsservices

Montgomery County's agricultural reserve is an important environmental resource for future farm enterprises. A strong agricultural heritage provides a diverse business community and a strong economic base. Combining these strengths with the commitment for farmland preservation makes Montgomery County an attractive place to live and work.

Agricultural activities occupy about one-third of Montgomery County's land area. Over three quarters of the 93,000-acre agriculture reserve is preserved through transfer of development rights or easement purchase initiatives. The County's diverse agricultural industry – 540 farms and 350 horticultural enterprises – produce millions of dollars in economic contribution from farm products and farm operations. The majority of Montgomery County farms are family-run operations, many reaching back several generations, which employ more than 10,000 residents. The County has 540 farms, of which 42 percent are farmed as a primary occupation. Cash grain farms are the predominant agricultural use in the County covering over 45,000 acres. The County ranks number one in the State for total acres planted in berries. There are 219 farms or 40 percent that produce table food crops-products for direct human consumption.

Horticulture

During the past 36 years, the Horticultural Sector has grown dramatically. The 350 horticultural businesses employ more than 7,000 of the people working in agriculture. Horticulture is one of the largest sectors in agriculture and includes nurseries and landscaping companies, arborists, sod farms and lawn care firms, and green house businesses.

Twenty percent of the horticultural industry in Maryland is in the County and Montgomery County ranks second in the State in total number of horticultural firms.

Equine Industry

Horses and equestrian facilities are a major component of the agricultural industry. There are almost 10,000 horses in the County and they represent a tremendous opportunity for farmers in terms of the supplies, services and products needed to support the horse population which exceeds the population of cows. The growing hay industry in Montgomery County is directly proportional to the growing number of horses. High quality veterinarians that provide services to horses are now available for other livestock operations in the County.

Agriculture for the Future

Montgomery County is committed to sustaining a viable agricultural industry. The Agriculture Reserve established in 1980 by the Preservation of Agriculture and Rural Open Space Functional Master Plan, provides 93,000 acres for farming. A variety of private organizations assist farmers to prosper in Montgomery County: Montgomery County Farm Bureau, Agricultural Advisory Committee, Agricultural Preservation Advisory Board and Montgomery County Farmers Markets work together with the University of MD Extension, Soil Conservation District, and Farm Service Agency.

Farmland Preservation-The County currently ranks 3rd in the nation for total easement acres.

Achieved Phase I farmland preservation goal (Jan 2009) protecting 70,000 acres.

Accomplished through various easement programs (MALPF, AEP, RLP, MET, BLT, TDR).

TDR Easements are the largest part of the Phase I goal retaining 1 lot / 25 acres.

Economic Contribution to County's Economy

Over 157 County farms have annual sales of \$10,000 or more. The average farm size is 118 acres and 33 percent of the farms are greater than 50 acres in size. The County has experienced 2.7 increase in farms from 1 to 9 acres in size.

Traditional Agriculture	\$ 48,341,000
Horticultural Industry	\$154,378,185
Equine Industry	<u>\$ 84,855,896</u>
Total	\$287,575,081

Montgomery County Statistics
